MEHROZ FAROOQ

Full Stack Developer | MERN Stack | Next.js | Node.js | System Design & Scalability

Lahore, Punjab, Pakistan | +92 323 6434205 | mehrozfarooq127@gmail.com | LinkedIn | Portfolio | GitHub

PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience architecting and scaling production web applications across the MERN stack, Next.js, TypeScript, PostgreSQL, and PHP/MySQL. Specialized in performance engineering and system design, including cutting critical API response times from 23 seconds to under 500 milliseconds and cleaning/normalizing a 10M+ record property database for an enterprise client. Proven track record scaling a SaaS marketplace to 30,000+ monthly users and 10,000+ daily API requests using Redis caching, BullMQ queue architecture, and microservice-style backend design. Hands-on with VPS/RDP deployment, third-party API and search integrations (Orama, Behiiv, SimilarWeb), AI-powered product features (GPT-4, Gemini, autonomous agents), and modern AI-assisted development workflows (Claude Code, Cursor, Codex). Experienced leading feature delivery end-to-end, mentoring developers, and partnering directly with leadership on product strategy.

KEY ACHIEVEMENTS

- Slashed critical API response times from 23 seconds to under 500 milliseconds through query optimization, database indexing, Redis caching, and background job processing — a 97%+ latency reduction.
- Scaled a SaaS tools marketplace (AIChief) to 30,000+ monthly users and 10,000+ daily API requests across a catalog of 12,000+ listed tools.
- Cleaned, deduplicated, and normalized a 10M+ record property database (PHP/MySQL) for a Dubai-based real estate client, improving data reliability for downstream reporting.
- Designed Redis caching and BullMQ queue architectures that improved application throughput, reliability, and horizontal scalability across two production platforms.
- Achieved 95+ Lighthouse performance and SEO scores across multiple production applications through Core Web Vitals optimization and Next.js SEO best practices.
- Built and shipped AI-powered product features using GPT-4, Gemini, and OpenRouter, including autonomous AI agents for content generation.
- Mentored junior developers, led pull request reviews, and participated in technical interviews and hiring decisions for full stack engineering roles.

PROFESSIONAL EXPERIENCE

Full Stack Developer — Xihawks Nov 2025 – Present Link: AIchief

Lahore, Pakistan

- **Scaled** AIChief, a SaaS AI-tools marketplace, to 30,000+ monthly users and 10,000+ daily API requests across a 12,000+ tool catalog, by building the platform's Tool Listing System, Ranking Algorithm, Subscription Management, and Analytics System.
- **Cut backend load and improved response reliability** by implementing Redis caching and BullMQ background job processing, supporting consistent performance under 10,000+ daily requests.
- **Resolved critical Stripe 3D Secure payment failures** blocking checkout completion, restoring a broken revenue path and eliminating a top customer-support escalation.
- **Increased organic discoverability** by building a site-ownership verification system (meta tag, HTML file, script, and business email methods) and a backlink creation module used across the platform's SEO tooling.
- **Reduced manual dashboard maintenance** by migrating core forms to React Hook Form, revamping user dashboards, and building cron jobs, chatbot features, and third-party integrations including SimilarWeb.
- **Improved product decision-making** by developing a user journey tracking system that captures pre-purchase behavior, and by partnering directly with management on product planning and feature strategy.
- **Upheld engineering quality standards** by mentoring junior developers and reviewing pull requests across the team.

Full Stack Developer (Project Lead) — Atrule Technologies Mar 2025 – Nov 2025

Multan, Pakistan

- **Delivered a multi-branch Expense Tracker platform from scratch as project lead** over one developer, architecting a scalable backend with Redis caching and BullMQ queue processing to support multi-role approval workflows end-to-end.

- **Reduced order fulfillment delays** by building a Customer Order Pickup Dashboard (WynShop) — a React PWA with Redux Toolkit and a Node.js backend featuring real-time notifications, barcode scanning, and order tracking.
- **Improved scalability and maintainability** by migrating the backend from LoopBack 4 to Node.js/Express, and automated scraping and updates for 30,000+ items via scheduled cron jobs.
- **Achieved 95% SEO and speed scores** by developing the Quality Shop Marketplace frontend in Next.js and Tailwind CSS, integrating .NET Core APIs to synchronize Shopify product data.
- **Boosted system performance and scalability by 25% and cut processing time by 200ms** through targeted workflow automation.

React Developer — Edusoft System Solution **Nov 2024 – Feb 2025**

Multan, Pakistan

- **Cut manual record handling from days to minutes** for 30+ employees by enhancing an internal Employee Management system with master-detail forms and complex filtering.
- **Delivered a working MVP within weeks** by initiating and architecting an Account Management System from scratch, designing all core components independently.

MERN Stack Developer — Webtech Smart Solution **Jun 2023 – Nov 2024**

Multan, Pakistan

- **Increased user bookings and satisfaction** by engineering a full stack Smart Parking Solution with real-time reservation tracking, Mapbox geolocation, and Braintree payment processing.
- **Replaced fragmented manual processes** by delivering a Rental Management System and a Tuition Booking platform covering lease tracking, payments, scheduling, and in-app messaging — consolidating multiple workflows into unified platforms.
- **Improved engagement and operational efficiency** by designing, developing, and deploying scalable full stack applications with maintainable, production-ready code.

Full Stack Developer — Freelance / Contract (Part-Time) **Nov 2022 – Present**

Remote

- **Simplified access control across products** by proposing and implementing a unified role-based access control (RBAC) dashboard, reducing development complexity versus maintaining separate dashboards.
- **Achieved 95+ Lighthouse performance and SEO scores** by improving application performance with caching strategies, Redux, and React Query.
- **Enabled multi-format content generation** by building AI-powered systems using GPT-4, Gemini, and OpenRouter that generate content from links, PDFs, and voice input, plus supporting AI agents. **Link:** **placed.today**
- **Maintained clean, scalable delivery** by designing maintainable folder structures and code architecture while collaborating within a 5-6 person cross-functional team.

Full Stack Developer — Data Engineering Project — Freelance Client (Dubai, UAE) **2026**

Remote

- **Improved data integrity for a 10M+ record property database** by designing and running a PHP/MySQL data-cleaning pipeline that deduplicated records and standardized inconsistent fields for a Dubai-based real estate client.
- **Enabled reliable downstream reporting** by validating and restructuring large-scale legacy data prior to migration, working directly with raw, unstandardized source data.

PROJECTS

QwizzyAI *(Oct 2023)*

- Built a full MERN stack interview-prep platform integrating GPT-4 and Gemini for dynamic question generation, with user profiles, bookmarking, and community voting — consolidating interview prep, curation, and AI-assisted practice into one platform. Tech: React, Node.js, MongoDB, Express, Gemini API, GPT-4.

TutorGround *(Jan 2024 – May 2024)*

- Built a MERN stack tutoring marketplace with real-time WebSocket messaging, streamlining tutor discovery by location, subject, and pricing. Tech: MongoDB, Express, React, Node.js, WebSocket.

Inventory Management System *(Jan 2025 – Feb 2025)*

- Built a full MERN stack inventory platform as sole developer, with PDF generation and analytics, centralizing sales, stock, and product lifecycle management. Tech: MongoDB, Express, React, Node.js.

Expense Tracker *(Oct 2025)*

- Led development of a PWA expense tracker with NestJS backend, React frontend, multi-role approval workflows, and Cloudinary document uploads, replacing fragmented manual expense tracking with a unified, auditable system.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, Redux Toolkit, React Query, React Hook Form, Tailwind CSS, PrimeReact, Ant Design, Chart.js

Backend: Node.js, Express.js, NestJS, PHP, REST APIs, Socket.io, JWT, OAuth 2.0, BullMQ, Puppeteer, Web Scraping

Databases: MongoDB, PostgreSQL, MySQL, SQL Server, Prisma, Sequelize, Mongoose, TypeORM, Data Migration & Cleaning

Architecture & Scalability: System Design, Microservices, Software Architecture, Caching Strategies, Redis, Background Jobs, Queue Processing, Database Design & Query Optimization, Performance Optimization, API Design

Cloud & DevOps: AWS S3, Docker, VPS Deployment, RDP, PM2, GitHub Actions, CI/CD, Git/GitHub, Vercel, Railway, Netlify

Search & Integrations: Orama Search, Behiiv API, SimilarWeb API, Third-Party API Integration, Payment Gateway Integration (Stripe, Paypal Braintree)

Testing: Jest, Jasmine, Unit Testing, Integration Testing, End-to-End Testing

Security: RBAC, Rate Limiting, Input Validation, OAuth, JWT Authentication, API Security

SEO & Performance: Next.js SEO, Core Web Vitals, Lighthouse Optimization, Server-Side Rendering

AI & Automation: GPT-4, Gemini, OpenRouter, AI Agents, Prompt Engineering, Workflow Automation

AI-Assisted Development: Claude Code, Cursor, Codex, Antigravity, Qoder

Methodologies & Leadership: Agile/Scrum, Technical Mentoring, Code Reviews, Technical Interviews, Project Leadership, Team Collaboration

EDUCATION

MS in Artificial Intelligence — University of Management and Technology, Lahore
Lahore, Pakistan | Jan 2026 – Jan 2028 | continue

Bachelor of Science in Information Technology — Bahauddin Zakariya University
Multan, Pakistan | Oct 2020 – Sep 2024 | Final CGPA: 3.61

FSC Pre-Engineering — Aspire College Mian Channu
Mian Channu, Pakistan | Jun 2018 – Dec 2020 | 884/1100 (97% in Mathematics)

CERTIFICATIONS

- **Full Stack Web Application Development** — National Vocational & Technical Training Commission (Jan 2022 – Jul 2022)
